

note

North Northamptonshire Health Needs Study

Having been appointed to undertake the North Northamptonshire Health Needs Study we have made the following progress.

- Attended an inception meeting with Andra Stopforth on the 9th March. This meeting was attended by Margaux Watkins (Quod), Andrew Buroni (RPS), Andra Stopforth (NN Joint Delivery Unit (JDU)) and Elva Phelan (Quod). At this meeting we discussed the JDU's aspirations for the Health Study.
- Following the meeting we issued and agreed a set of minutes. This provides a summary of the discussion outlining topics covering and actions/ next steps.
- We are in the process of agreeing the terms of the contract and appointment of RPS as a sub consultant.
- We are in the process of reviewing the suit of documents sent over by the JDU relating to the various consented Sustainable Urban Extensions (SUEs). This includes reviewing each of the Environmental Impact Assessments and Section 106 agreements associated with the SUEs. We have compiled all the relevant information from each of these to establish the extent of each of these developments and the agreements that have been reached on each site. The key information recorded includes;
 - a. Number of homes and associated projected population
 - b. Methodology used to calculate the population/ child yield in each application
 - c. Details of employment generated
 - d. Social infrastructure included within the proposals, with specific focus on schools, health facilities and any non-defined "community facilities"
 - e. Information on the relevant triggers agreed associated with social infrastructure provision
 - f. Financial contributions associated with social infrastructure (including health)
 - g. Phasing details

- We have compiled a library of documents and evidence that has been done in relation to health in North Northamptonshire and the SUEs and are undertaking a literature review of this work to inform the baseline and background context for the study.
