Questions Log

Questions raised at Committee on 10th June 2009:

With reference to NI 195, what is the difference between litter and detritus?

Litter

There is no statutory definition of litter. The Environmental Protection Act 1990 (s.87) states that litter is 'anything that is dropped, thrown, left or deposited that causes defacement, in a public place'. This accords with the popular interpretation that 'litter is waste in the wrong place'.

However, local authority cleansing officers and their contractors have developed a common understanding of the term and the definition used for NI 195 (and for the LEQSE) is based on this industry norm.

Litter includes mainly synthetic materials, often associated with smoking, eating and drinking, that are *improperly* discarded and left by members of the public; or are spilt during waste management operations.

Detritus

There is no statutory definition of detritus, however, local authority cleansing officers and their contractors have developed a common understanding of the term and the definition used for the NI 195 (and for the LEQSE) is based on this industry norm.

Detritus comprises dust, mud, soil, grit, gravel, stones, rotted leaf and vegetable residues, and fragments of twigs, glass, plastic and other finely divided materials.

Detritus includes leaf and blossom falls when they have substantially lost their structure and have become mushy or fragmented.

For Council tax and NNDR collection can we provide information to show whether we will achieve the year end target?

For both LPI 9 and LPI 10 a profile target is now included in the performance report to show whether performance is on target each month. This is to help indicate performance for the year. For example if we are achieving the monthly profiled target then the year end target will be achieved.

Questions raised at Committee on 28th September 2010

Why are lower percentages better for NI 195a-d?

There had been some confusion around NI 195a-d and why lower percentages are better. The indicators highlight the % of land/highways that have levels of litter / detritus / graffiti / flyposting that are unacceptable, meaning that a lower figure represents cleaner streets, which of course is more desirable.

Questions Log

Questions raised at Committee on 28th September 2010

Can a year end estimate for the number of affordable homes be included?

Year end estimates for the number of affordable homes expected in the year have also been included.

Questions raised at Committee on 25th September 2012

What do the volume figures mean in the Performance Update?

In response to a member query, volume figures were added to relevant performance indicators in 2011 to give context to the data. Here is the breakdown for what the figures represent for each of the indicators:

- NI 157a Number of major planning applications processed in 13 weeks / Total number of major planning applications received
- NI 157b Number of minor planning applications processed in 8 weeks / Total number of minor planning applications received
- NI 157c Number of other planning applications processed in 8 weeks / Total number of other planning applications received
- LPI 78a Number of days to process new claims / Number of new claims received
- LPI 78b Number of days to process change in circumstances / Number of change of circumstances received
- MPI 8 Number of invoices paid on time / Number of invoices received
- LPI 204 Number of appeals against authority's decision to refuse planning applications / Total number of rejected planning applications

Questions raised at Committee on 3rd November 2015

How is the target for NI 154 calculated?

NI154 is actually an annual figure which is calculated by a physical count of all new houses on each site at year end (March 2016) so there isn't any in year figures to provide for 2015/16.

The council are required to deliver 10,400 homes over a 20 year period between 2011 – 2031, which equates to approximately 520 dwellings per year.

Any shortfall is then required to be built in the next 5 year period, so for 2015/16 in addition to the 520 required there will also be 70 extra homes required to achieve the shortfall.

The 2015/16 data will therefore be available early in 2016/17.

As of August 2013, the sickness figures for Customer Services and Information Technology have been split to create a separate row for Information Technology.
